

MRV S^{II}

073 Features & Benefits

078 MRV S^{II} Outdoor

082 Dimensions

Advanced Technology High Efficiency Super Comfort Easy Installation High Reliability

Advanced Technology

Increasing enthalpy by replenish gas, realize the unit powerful heating capacity

Taking the heating cycle as an example, when environment tempetature is low, heat exchanged capability of outdoor unit is depressed. The amount of air returned by compressor is reduced, increase the amount of refrigerant in the heating cycle of the indoor unit heat exchanger, There by achieving improved heating capacity.

DC inverter fan motor

- DC inverter fan motor more higher efficiency in part load running
- 16-stage speed control; high efficiency running especially in low speed
- Efficiency increase 45% comparing with AC motor and power input largely decrease
- Big diameter fan
- 570mm big diameter fan, more big air flow and more higher efficiency(8/10/12HP)

Advanced Technology

High EER and COP(8/10/12HP)

The promotion of energy efficiency.

Leadership in technology(4-6HP)

- Two-stage super cooling cycle technology, increased unit efficiency by 9%. (Double fan)
- Maximizing 30°C undercooling, increase unit refrigerating capacity by 46%.

Upgraded configuration, upgraded performance (8/10/12HP side discharge)

Bigger outdoor capacity, more flexible application

High efficiency DC fan motor

- DC fan motor with stepless inverter control, efficiency increase 45% comparing with AC motor and power input largely decrease

Large diameter fan

- Ø570mm big diameter axial flow fan
- Zigzag design, reduce airflow disturbance, air volume is bigger, the noise is lower

High efficiency condenser

- New type high efficiency Ø7 inner grooved tube
- New hydrophilic corrugated fissure fin, high efficiency

Vector inverter control

- 180 degrees sine wave vector control, 64-bit operation
- High precision control, to achieve high efficiency and lower noise

Double pressure sensor

- Equipped with high and low voltage, pressure double sensors
- Accurate pressure control, the system run more smoothly, more energy efficiency

Twin rotary DC Inverter compressor

- High chamber DC inverter twin rotary compressor
- Small vibration, low noise, high energy efficiency

Indoor units and outdoor units self-cleaning

Indoor units and outdoor units cleaning mode conversion with nonstop, make abundant use of ODU waste heat to IDU defrosting. At the same time, the IDU uses the waste heat of the ODU to defrost the heat exchanger, to dry the condensed water, effectively prevent mold breeding.

High Efficiency

High energy efficiency

DC inverter compressor

Haier takes DC INV. compressor, 5% power input lower. (14kW)

DC fan motor and 550mm big fan

38% power input lower and 8% airflow higher

Larger heat exchanger

Heat exchange area rise 10%

Charge valve

Built-in charge valve enables safer and easier maintenance

Low standby power

New PCB programme, reduce 20% standby power consumption

Low noise level

Night quiet operation function

Noise can be reduced to 45dB(A).

New DC inverter twin rotary compressor

- Small torque change, good dynamic balance, the system runs stably, little vibration, low noise, high efficiency.
- More higher efficiency in part load running.

Super Comfort

- 1 New aerodynamics fan 550mm super big diameter aerospace helix fan. lowering sound level 3dB(A).
- 2 Enlarged air inlet path and spiral air outlet path air flow direction follows the grill direction. lowering sound level 2-4 dB(A).
- 3 Automatic sound-lowering programme night mode set by PCB, 8dB(A) lower.

Low noise operation

- DC inverter compressor, smooth operation, no need frequent start the compressor, effectively reduce the noise outdoor.
- Vector inverter control, more precise control.
- DC fan motor, motor bracket used the non-resonance structure, ensure smooth running of the motor, reduce operating noise.
- Big diameter fan, design according to aviation quieter principle.

Easy installation

Compact side discharge design, big capacity, small footprint /small footprint, only 0.42m², 43% floor area can be reduced.

Easy Installation

- 1 Double side "4" handles
Easy to carry
- 2 "888" test panel
All running data & error code can be checked from "888" screen, which is easy for installers
- 3 "Four-way" pipe connection
4-way (front, back, left & right) pipe connection, easy to design and install

Long pipe length, high height drop

- Total pipe length: 300m.
- Single pipe length: Max.175m.
- From outdoor to the first branch pipe: 135m.
- From the first branch to the farthest indoor door unit: 40m.
- Height drop: 50m(outdoor above)/40m (outdoor below).
- Height drop between indoor units: 15m.

Parameter display panel

The first original parameter display panel on the side. The parameter can be observed directly by opening the protective cover in case of maintenance, to avoid removing the repair board.

Easy maintenance for control

The control box is in front, reserving space 108mm between control box and top panel, easy maintenance from the top control box is with hinge design, easy to open for maintenance(8/10/12HP).

Compact side discharge design

No need additional ventilation hood comparing with top discharge unit.

Separate refrigerant charging valve

Easy for refrigerant charging.

High Reliability

Refrigerant automatically reclaim technology

Set refrigerant automatically reclaim through dip switch, the refrigerant in indoor and pipe can be automatically return to outdoor, convenient in maintenance and reducing waste of refrigerant, reduce customer maintenance cost, improve the efficiency of after-sales maintenance.

Refrigerant control technology

Refrigerant control technology without high pressure accumulator, reducing the refrigerant volume and enhancing the running efficiency.

Air inlet grill design on right side panel

Air inlet grill design, reducing the module temperature and avoid air dust into air conditioner.

High and low double pressure sensor

- Double pressure sensor with PID control technology.
- Together with high speed communication to realize the quick start of compressor and more precise control, the temperature can be control ±0.5°C.
